

## **Pete and Amelia's Army Neurofibromatosis Fundraiser**

*\*All money will be divided to go towards NF Northeast & NF2 Biosolutions*

**What is Neurofibromatosis (NF)?** NF is a set of genetic disorders that cause tumors to grow randomly on nerve endings throughout the body. These tumors commonly occur in the brain and spine and can cause bone deformities, disfigurement, deafness, severe balance problems, loss of mobility, blindness and in some cases, like Amelia's, cancer. **NF is more prevalent than cystic fibrosis, Duchenne muscular dystrophy and Huntington's disease combined.**

**What is Pete and Amelia's Army?** Pete and Amelia's Army is a team that focuses on raising money for a cure for Neurofibromatosis, especially type 2. Pete Nobis has NF type 2 and has vestibular shwanomma tumors (located between the ear and brain), tiny brain tumors that are being closely watched through yearly MRI's, slight facial paralysis, balance issues and hearing loss (due to the vestibular shwanommas). Pete is the first one in his family to have NF2 (spontaneous mutation case). Amelia Nobis has NF type 2, and has had a malignant grade 3 golf sized brain tumor removed, several spinal tumors, cataract in the eye, café au lait spots on her body, a spot on the front of her brain, and is now battling mobility issues in her one foot (we are currently awaiting results to see what our next steps are).
